

SCIENTIFIC PROJECT MANAGER with LEADERSHIP SKILLS

OvaCure is looking for an ambitious individual to join us in the role of Scientific Project Manager. You believe that success comes from collaboration and you are a natural team player who thrives in an environment where you work towards shared goals in an agile team.

This is a split role including scientific grant writing, protocol reviews and clinical trial monitoring in a not-for-profit community. You will also help to define the organisation's future strategy and be the key liaison to our principal investigators in terms of project management, contracts, milestone and budget expectations. There will be opportunity to attend to international conferences and events.

Key Responsibilities:

Championing our scientific footprint:

- Leading our international clinical projects with top researchers by continuous project management and milestone reviews
- Managing Stakeholder relationships with Key Opinion Leaders in the fields of Gynaecology, Immunology and Oncology and the OvaCure Strategic Advisory and Scientific and Clinical Advisory Board
- Engaging in the scientific community to identify new research topics, new collaboration partners and rising stars
- Performing regular literature reviews to keep the organization updated in the state-of-art in gynaecological cancer and novel treatments

Communicating our science to a broader public

- Mastering scientific communication and writing to create content with advances in Social Media, newsletter content and fundraising material
- Driving grant writing for Danish and international foundations
- Scientific lead at OvaCure events, including mapping participants, sending invitations, nurturing contacts and being a strong speaker

Leading OvaCure into the future:

- Play a central role in formulating the OvaCure strategy
- Take leadership in the team and in all projects, not only your own
- Be a resourceful, proactive and valuable member of the team

Skills & Qualifications:

1. Minimum of an undergraduate degree in Life, Health or Pharmaceutical Sciences
2. 2-5 years experience in either grant writing, clinical project management or medical writing
3. Work experience in either gynaecology, immunology and oncology; start-up community and/or submitting proposals is a requirement
4. Excellent written and verbal English (native or near native level), Danish is an advantage
5. A track-record in project management or a natural ability for organisation of parallel projects
6. Highly self-motivated and able to liaise and engage with a range of international stakeholders
7. Able to work as part of a team and independently to achieve deliverables
8. Knowledge of clinical trial design, data reporting and management is an advantage
9. Experience in public speaking is considered an advantage

Why work with OvaCure?

OvaCure is an international, non-profit health start-up which is fast paced and dynamic. We are only 7 years young and work with some of the leading scientists and institutions in the world. You will have opportunity for career growth and be the master of your everyday. You find work that is both challenging and rewarding.

The job starts as soon as possible and applications are acted upon immediately.

Submit your application to mail@ovacure.org or to find out more, please contact Alexander Peitersen, ap@andnow.dk

About OvaCure

OvaCure was established in 2014 by a group of visionary doctors, philanthropists and entrepreneurs, as a well-funded enabler.

Since then, we have been working towards the cure for women with ovarian cancer through innovation, collaboration and initiation of new clinical research projects.

Our clinical projects are developed and accelerated on a truly global scale and conducted by leading scientists within the fields of immunotherapy, oncology and gynaecology.
