

Thank you very much for inviting me!

Instead of flowers, I have donated 150 DKK to OvaCure in your name.

Every year, more than 500 Danish women are diagnosed with ovarian cancer. It is the most deadly gynecological cancer, yet knowledge and treatment are severely lacking.

OvaCure, a small Danish NGO, works to create new knowledge and better treatments for ovarian cancer patients by bringing together the world's best cancer researchers.

This donation goes uncut to the innovative patient studies that OvaCure supports around the world and benefits all of the women who have or can get ovarian cancer!

I look forward to seeing you.
